

Neptune Corn Farm, LLC
1234 E. Mars St.
Shelby, Nebraska 68508

1. Products

We grow corn based on the Renewable Fuel Standard (RFS) for the production of biofuels, including corn ethanol. Corn ethanol is ethanol produced from corn biomass and is the main source of ethanol fuel in the United States.

2. Capacity

We grow corn on 650 acres. The BU/Acre is 88.6 or 57,590 total bushels.

3. Past Performance

We have contracts with various Biorefinery plants in the state to supply feed stock.

4. Past Experience

We supply 50,000 bushels of corn biomass to Corn Fuel Renewables, Inc every year. Contact Franklin Munson at 402-850-3108.

5. Cyber Security Policy.

We have completed the NIST 800-171 Self Assessment task and uploaded the score to SPRS. We continue to secure our information system based on regulation.
